

24*7 automatic hairfoil dispenser

QUICK SET UP GUIDE

Thank you for buying the PROCARE 24*7, this short guide will help to get your machine up and running.

As part of commitment to reducing wastage we do not print the full operating manual, however it is available online and we recommend you read through it prior to using the machine for the first time.

The manual also has some helpful troubleshooting tips should you require them.

To see the manual - Visit hairfoil.com and click on the 24*7 machine, you'll then find the 'online manual' link on right hand side of the page.

1. Contents: 24*7 machine, power supply lead, foil collection tray & quick set up guide.
2. Unpack your machine and check you have the contents above.
3. Open the lid of the 24*7 by gently squeezing the front catch and lifting back until the safety lock engages holding the lid in place.
4. Remove the tamperproof strip from the foil roll and insert roll into the body of the machine. The plastic foil core has one large and one small side matching the locators inside the machine. When the roll is correctly inserted the foil will feed from underneath and the roll will lay flat and secure
5. Pull out a short amount of foil (about 5cm) to cover the foil sensor at the front of the machine.
6. Close the lid by lifting and then releasing the safety catch as you pull forward.
7. Fit the foil collection tray to the front of the machine and ensure it is securely in place.
8. Connect the power lead and plug into the wall socket. Turn the wall socket on, turn the machine on using the on/off switch which is on the rear of the machine.
9. Select foil, fold lengths and numbers of foils using the + and - buttons on the keypad. To select or de-select a double fold press the double fold button (Light indicates double fold).
10. When you're happy with your selection press the start button. Remove the first foil when it has landed in the tray (This will allow the machine to neatly stack the remaining foils) then leave the 24*7 to trim, fold and stack your foils. The 24*7 produces approximately 20 foils per minute.

For warranty claims simply provide your receipt and serial number - found on the back of your machine next to the on/off button - to your supplier/distributor.
